1 Introduction

1.1 Purpose and Scope

Enabling customers to apply for a new **Basic Payment Bundle** with a Payment Account **and a Debit Card** and activate the Payment Account, requests for the Debit Card and the Bundle Package in ABN AMRO external systems.

This document extends Epic OH_01 by providing also the option of requesting the Debit Card as part of the bundle.

Line Of Business

Payment Account , Debit Card

Customer Segment

B2C (Business-to-Consumer) Banking Customer

Channels

Internet Banking (Self-Service)

1.2 Business Needs

As an existing customer, once I applied via Internet Banking site for a new Basic Payment Account Bundle and signed on the required documents, I would like to have my **Payment Account , Debit Card** and **Bundle Agreement** activated.

1.3 Application Involved

Application	Description	Provider	Impacted
Catalog ONE	Amdocs Product Catalog (Catalog ONE) enables the management of offers, products, and accessories. It defines product characteristics, rules, pricing policies, and eligibility conditions. The Basic Payment Bundle will be created in Catalog One to support the Bundle ordering for ABN AMRO.	Amdocs	Yes

Application	Description	Provider	Impacted
Digital ONE	Amdocs Digital ONE provides a set of value-based, self-contained business functions which support diverse commerce and care workflows. The following business functions will be used in ABN AMRO banking solution: In Order Handling - New Business process map will be introduced to activate IBAN and agreement in external systems.	Amdocs	Yes
ABN AMRO Systems	CRC - Centrale Rekening Courant ABN AMRO banking system which enables activation and reservation of the iBAN. APA - Agreement Proposition Administration ABN AMRO banking system which manages the packages of the customer. PIM - Payment Instrument Management ABN AMRO banking system which enables activation of the Debit Card.	ABN AMRO	No

Document ID	Type	Document Name
PIM Integration from D1		PIM - Create Instrument⁴
Epic GEN_01 Security		GEN_01: ABN AMRO - Security & User Authentication⁵

1.5 Assumptions

ID	Item	
01	Product Inventory	Although Digital ONE stores the product inventory and activates it in D1, the master record of customer-owned products remains in ABN AMRO system. Any queries on PI should be performed against the master system of record.
02	Charging	ABN AMRO systems will be responsible for notifying the ABN AMRO charging system.
03	ABN AMRO PIM Integration	The integration between D1 and PIM is sync. Once PIM return success status, it is PIM responsibility to handle failures/ functionalities post this returned status. (functionalities such as notifying P&C or other systems). The success result from PIM will derive the successful completion of the step in D1 and the continuation to the next step in the map.
04	ABN AMRO APA Integration	The integration between D1 and APA is sync. Once APA return success status, it is APA responsibility to handle failures/ functionalities post this returned status. (functionalities such as notifying P&C or other systems). The success result from APA will derive the successful completion of the step in D1 and the continuation to the next step in the map.

⁴ <https://confluence/pages/viewpage.action?pageId=534136345>

⁵ <https://confluence/pages/viewpage.action?pageId=534132876>

ID	Item	
05	One Customer	- Customer Requestor (Creator): The customer who logs in and places the order, either for himself or on behalf of another customer. - Receiver (BC ID): The customer to whom the product will belong. The receiver can be either the customer requestor or a different customer. A Product Order and Product Inventory are owned by a single customer receiver. For this EPIC, the receiver is assumed to be the customer requestor. A bundle within a Product Order is associated with one customer (receiver)
06	Handled in future epics	Notification to customer when the order is completed will be handled in Epic GEN_02.
07	Single PA and single package in the order	Per scope definition of MVP, single Payment Account/Package and single Debit card is activated as part of the order.

1.6 Terms & Definitions

Term	
C1 / CatalogONE	Amdocs CatalogONE is an online product catalog based on TM Forum standards. It enables the management of commercial offerings and product definitions.
D1 / DigitalONE	Amdocs DigitalONE consists of a set of functional capabilities used to handle the ordering flow, including order capture and fulfillment.
OC	Amdocs D1 Order Capture (OC) solution consists of a set of functional capabilities used to handle the negotiation of the order before submission
AOM	The Amdocs Order Management (AOM) solution consists of a set of functional capabilities used to handle the order after submission and for Amdocs Order Fulfillment. Also referred as Order Handling.

2 High Level Solution

2.1 Overview

Customers can apply for a new **Basic Payment Bundle** with a Payment Account **and a Debit Card**.

The **order fulfillment** process will be responsible for fulfillment of the Basic Payment Account Bundle order.

For the **request** of the **Debit Card**, an integration to **ABN AMRO PIM system** will be introduced, **triggering the fulfillment of the DC**.

The call to **APA** for activating the package will **include** the **Debit Card** as well as the Payment Account that the Debit card relates to. Both under the same Basic Payment Bundle.

Note: The external integrations for activating the Payment Account and APA are described in epic OH_01.

The **Debit Card activation** will be **dependent on** the successful **activation of the PA** (the successful call to CRC).

The call for **activating the package in APA** will be **triggered only after the PA and the DC are activated successfully**.

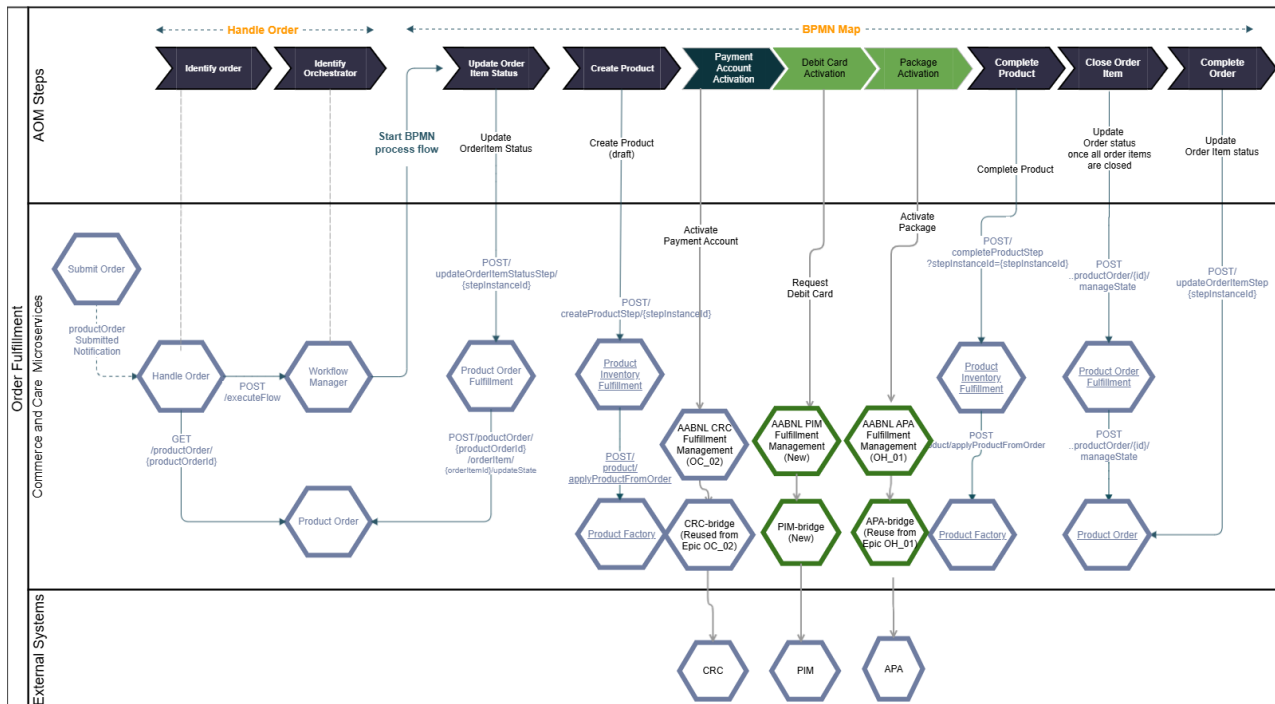

2.2 Business Flows

2.3 Business Use Cases

Use Case ID		
#01	The customer orders a Basic Payment Account Bundle, with Payment Account and Debit Card of Regular DC and submits the order for fulfillment	The Order is fulfilled successfully . The Payment Account (iBAN), the Regular Debit Card and the package are activated successfully .
#02	The customer orders a Basic Payment Account Bundle, with Payment Account and Debit Card of Wealth DC and submits the order for fulfillment	The Order is fulfilled successfully . The Payment Account (iBAN), the Wealth Debit Card and the package are activated successfully .

2.4 Flow Diagram

2.4.1 Diagram

2.4.2 Action Integration Point

Step	Commerce Sub Domain	Description
Debit Card Activation	AABNL PIM Fulfillment Management	Activate the Debit Card through PIM Integration
Bundle Package Activation	AABNL APA Fulfillment Management	Activate the Package through APA Integration

2.5 Solution Details

A new **Business Process Map** will be handled for the **Debit Card Product**.

The following **new steps** will be added **to** the **Business Process Map** for supporting order of Debit Card as part of the Basic Payment Bundle:

Step	Relevant for Order Item Fulfillment Map	Mandatory/ Conditional	Description
Activate Debit Card	Add Debit Card	Mandatory	The Debit Card Management system (PIM) activates the Debit Card in the order
Activate Package	Add Bundle	Mandatory	The Package Account Management system (APA) activates the Bundle Package in the order. The APA step will be triggered only once for the bundle and will include both the Payment Account , the Debit Card and the package.

2.5.1 Activate Debit Card

2.5.1.1 Overview

Operation	/ (see page 4) Create Instrument
D1 Microservice	AABNL Fulfillment MS
Overview Details	Activate a Debit Card

2.5.1.2 Description

A new **DigitalONE** operation will be introduced to **activate the debit card** within the product order item.

Main Request to PIM API:

	Request to PIM API	Description	D1 Source of data
1	accountId	iBAN	iBAN
2	holderCustomerId	Receiver Customer ID	The customer ID of the order
3	paymentInstrumentUsageld	Payment Instrument Usage	Should be different ID per the different DC Type. Characteristic Payment Instrument ID (refer to latest C1 model to verify the characteristic)

Main Response from PIM API:

	Request to PIM API	Description
1	cardSequenceNumber	Card sequence number, will be stored in the External Identifier of the order item and the product

Response codes from PIM:

Returned code	Description
201	Debit Card Created Successfully
400	"Client Side / Functional Error" Detailed Error List such as: ACCOUNT_ID_INVALID, HOLDER_CUSTOMER_ID_INVALID, CUSTOMER_NOT_ELIGIBLE, ACCOUNT_NOT_ELIGIBLE
401	Invalid or missing authentication SUBJECT_UNAUTHENTICATED

Returned code	Description
403	"SUBJECT_NOT_ALLOWED User is not allowed to perform this action
500	INTERNAL_SERVER_ERROR Technical issue with the service

2.5.1.3 Integration Point

Functionality	Application	Operation	Description	Provider	Consumer	Interface Type	Mode	Integration Direction
Activate	PIM	/ (see page 4) Create Instrument	Activate Debit Card	ABN AMRO	Amdocs	REST	Syn c	Southbound

2.5.2 Activate Package

2.5.2.1 Description

As part of Epic OH_01 the activation of the package in APA is described.

In the current epic the same integration will be reused and the DC will be passed to APA as additional linked product of the package.

Operation Logic:

Populate the input according to the following:

	Request to APA API	Description	D1 Source of data
1	linkedProductAgreement.product AgreementId	Debit Card product ID logic – in the response from PIM - the accountId (iBAN) last 10 digits concatenated with the last 2 digits from cardSequenceNumber in total 12 digits	

	Request to APA API	Description	D1 Source of data
2	linkedProductAgreement.startDate	Submission date	Submission date
3	linkedProductAgreement.productId	Product ID of the DC offer	Catalog external ID of the DC (SPO)
4	linkedProductAgreement.productId	The reference number of the segment eg 20 for debit card	Segment of the DC

2.6 Acceptance Criteria

2.6.1 Sunny Day Scenario

Test Name	GIVEN	WHEN	THEN
As part of fulfillment, Activating successfully regular DC with PA and bundle	Given the customer has requested a new Basic Payment Bundle with PA and regular DC and the Order Handling of Bundle, PA and DC succeeds.	When PIM processes the request successfully (returns code 201) And the DC and Bundle are successfully activated.	Then the bundle is activated with the Payment Account and the regular DC.
As part of fulfillment, Activating successfully Wealth DC with PA and bundle	Given the customer has requested a new Basic Payment Bundle with PA and wealth DC and the Order Handling of Bundle, PA and DC succeeds.	When PIM processes the request successfully (returns code 201) And the DC and Bundle are successfully activated.	Then the bundle is activated with the Payment Account and the wealth DC.

2.6.2 Rainy Day Scenario

Test Name	GIVEN	WHEN	THEN
As part of fulfillment, Activating DC with PA and bundle and the DC request fails Due to Technical or functional error	Given the customer has requested a new payment account and the Order Handling of DC Activation step fails whereas the PA Activation is successful	When fulfillment step of DC fail	Then system should Retry the call according to the configuration. After the retry attempts exhausted, the system should change the step to fallout. the order item is in Fallout and the fulfillment of the bundle package in APA is not triggered.

3 ABN AMRO system Integration

Following are the external systems used by Amdocs Ordering Systems and enhanced as part of this Epic:

Application	Description	Provider OAR ID	Consumer	Integrations Direction	Description
APA Agreement Proposition Administration	Package Fulfillment	AAB.SYS.01 7617	Amdocs AOM	South bound	Only the package product is fulfilled.
PIM - Payment Instrument Management ABN AMRO banking system which enables activation of the Debit Card.	Request for Debit Card		Amdocs AOM	South bound	

3.1 CatalogONE

In the POV, there will be **2 types of Debit Cards**.

Each DC will have its own **Payment Instrument ID**.

The **DC types will have same segment ID**.

4 Operational Aspects

4.1 Non-Functional

4.2 Authorization & Security

4.3 Error Handling

Errors will be logged in the log.

Any additional Error Handling should be solutioned in future epic.

4.4 Performance

TBD

4.5 Migration

Not Applicable.

Legacy Orders which was not initiated by Amdocs Ordering will not be migrated to Amdocs Ordering System.

5 Appendix

Not Applicable.
